External/ Donor Funding for health as percent of THE: This constitutes all funding available to the country by assistance from donors.

GHE as % of General Government Expenditure (GGE): This is a proportion of share of Government expenditures towards healthcare in the General Government Expenditures and indicates Government's priority towards healthcare.

Household Health Expenditure as % of THE: Household health expenditures constitute both direct expenditures (OOPE) and indirect expenditures (prepayments as health insurance contributions or premiums). This indicates the dependence of households on their own income/savings to meet healthcare expenditures.

Union and State Government Health Expenditure as % of GHE: The Union Government Health Expenditures includes the funds allocated by different Ministries and Departments of Union Government towards the healthcare of the general population and its employees (including funds allocated to local bodies). Similarly the State Government Health Expenditure includes the funds allocated by different Departments under all the State Governments towards healthcare of general population and its employees (including funds allocated to Local bodies and the funds allocated for health by Local Bodies from their own resources). This indicates the share of the Union Government and State Governments in the Government Health Expenditure which is an important indicator in a federal structure of India.

AYUSH as % of THE: AYUSH stands for Ayurveda, Yoga, Naturopathy, Unani, Siddha, and Homeopathy. It includes all the expenditure on non-allopathic care that comprises a range of long-standing and still-evolving practices based on diverse beliefs and theories. This indicates the share of expenditures under AYUSH system of medicines in the total health expenditure.

Pharmaceutical Expenditures as % of CHE: This includes spending on prescription medicines during a health system contact and self-medication (often referred to as over-the-counter products) and the expenditure on pharmaceuticals as part of inpatient and outpatient care from prescribing physicians. This indicates the share of pharmaceuticals expenditures in the current health Expenditure.

1.2 Expenditure Estimates by National Health Accounts Classifications

This section describes the distribution of current healthcare expenditures by National Health Accounts classification categories. Prescribed by the System of Health Accounts 2011 (SHA 2011) these have been adapted to suit the Indian health system context. The description of each of the classifications is provided under each Section of this report and the National Health Accounts Guidelines for India 2016. Given below is the distribution of current healthcare expenditures for 2021-22, (Rs. 7,89,760 crores) into healthcare financing schemes, revenues of healthcare financing schemes (source of financing), healthcare providers, and healthcare functions.

[6] GGE value for FY 2021-22 is Rs 70,98,451 crores. Receipts and Disbursements of States and Consolidated General Government, Economic Survey 2023-24.

1.2.1 Expenditure Estimates by Healthcare Financing Schemes

Healthcare financing schemes are the structural components of the healthcare financing systems. They are financing arrangements through which funds flow from the source for the provision of healthcare services to the population. **Table 4** shows the distribution of expenditures by healthcare financing schemes, followed by the description of all financing schemes relevant to the Indian context. A detailed description of these schemes is provided in the "National Health Accounts Guidelines for India", 2016.

Table 4: Current Health Expenditures (2021-22) by Healthcare Financing Schemes.

HF.3.3 All Household Out-of-Pocket Payment

This is a sub-category under HF.3 Household out-of-pocket payment. The expenditure in this category is paid by the household/ individuals at the point of receiving healthcare services. These are net of reimbursements of any nature (insurance/philanthropic donations etc.) and include all expenditures on inpatient care, outpatient care, childbirth, antenatal care (ANC), postnatal care (PNC), family planning devices, therapeutic appliances, expenditure on patient's transportation, immunisation, over the counter drugs and other medical expenditures (e.g., blood, oxygen, etc.

1.2.2 Expenditure Estimates by Revenues of Healthcare Financing Schemes

Revenues of Healthcare Financing Schemes are sources of financing from where the schemes draw their revenues. Table 5 presents the distribution of expenditures about revenues of healthcare financing schemes (sources of financing) followed by the description of all revenues of healthcare financing schemes relevant to the Indian context. A detailed description of these schemes is provided in the "National Health Accounts Guidelines for India", 2016.

health. These revenues are usually granted by international agencies or foreign Governments, or voluntary transfers (donations) by foreign NGOs or individuals that contribute directly to the funding of domestic healthcare financing schemes; and Direct foreign aid in kind (health care goods and services). These funds are classified under the sub category FS.7.1.4 All Direct Foreign Financial Transfers.

1.2.3 Expenditure Estimates by Healthcare Providers

Healthcare providers are the organisations or actors that provide healthcare services or goods as their primary activity or as one among others. **Table 6** presents the distribution of current healthcare expenditures by providers of healthcare, followed by the description of all healthcare providers relevant in the Indian context. A detailed description of these schemes is provided in the "National Health Accounts Guidelines for India", 2016.

This category comprises the agencies that manage Government financed health insurance schemes (Government trust and societies), agencies managing NPISH/Enterprise schemes, and others that are not covered by the other health provider categories given above.

HP. 10 Other Healthcare Providers not elsewhere classified (n.e.c)

This category includes providers that could not be classified in the above-mentioned categories due to the non-availability of information to identify healthcare providers for a particular expenditure line item.

1.2.4 Expenditure Estimates by Healthcare Functions

Healthcare functions refer to healthcare goods and services consumed by final users with a specific health purpose. **Table 7** presents the distribution of current health expenditures by healthcare functions, followed by the description of all healthcare functions relevant to the Indian context. A detailed description of these schemes is provided in the "National Health Accounts Guidelines for India", 2016.

expenditures by service consumed. This is further categorized into HC.7.1 Governance and Health system administration and HC.7.2 Administration of health financing (includes specific expenditure on administration of insurance companies and establishments managing health insurance schemes).

HC.9 Other health care services not elsewhere classified (n.e.c.)

The expenditure that could not be classified to any other services or functions as per the System of Health Accounts (SHA) 2011 guidelines and "National Health Accounts Guidelines for India" are included here.

HC.RI.1 Total Pharmaceuticals Expenditure (TPE):

Includes spending on prescription medicines during a health system contact and self-medication (often referred to as over-the-counter products) and the expenditure on pharmaceuticals as part of inpatient and outpatient care from prescribing physicians from both the private and public sectors.

HC.RI.2 Traditional, Complementary and Alternative Medicines (TCAM)

This category is a reporting item and provides expenditure related to TCAM due to its emerging policy relevance and a long-standing tradition of using AYUSH in the Indian health system. It includes all the expenditure on non-allopathic care (AYUSH - Ayurveda, Yoga, Naturopathy, Unani, Siddha, and Homeopathy) from both the private and public sectors. Expenditures are sourced from health and morbidity surveys, detailed demand for grants of the Ministry of AYUSH/ other Union and State departments.

1.3 Expenditure on Capital Formation

Gross fixed capital formation in the health care system is measured by the total value of the fixed assets that health providers have acquired during the accounting period (less the value of the disposals of assets) and that are used repeatedly or continuously for more than one year in the production of health services. In the Indian context, it includes expenditure on infrastructure, buildings, and machinery as well as expenditure on medical education, research, and training. As the non-availability of detailed expenditure, the capital expenditure is classified as HK.nec only. The following table provides information about capital formation by different actors in India.

Table A.6 presents key health financing indicators for select States for NHA estimates 2021-22. The indicators for States are important to understand the financing of health systems in the different States. This supports policymakers to identify States where funding can be augmented through alternate sources of financing or advocate for improved resource allocations for specific health schemes.

In Table A.6 above, Indicators are given only for select States as the expenditure data for some expenditure components of health accounts is collected through sample surveys. The survey used in the estimates includes the 75th round Health and Morbidity Survey by the National Sample Survey Office (July 2017- June 2018) for computing out-of-pocket expenditures (OOPE) and the survey on Health expenditure (2013-14) by Enterprises and Not for Profit Institutions Serving Households (NPISH/ NGO) by Public Health Foundation of India. Expenditures computed from these surveys are used for arriving at health account estimates at the National level. However, when computing health accounts estimates/ Indicators at the sub-national level especially for Union Territories', Small States, and the North-Eastern States, the values are not significant due to the small sample size adopted in the survey for these regions.
